Connecticut Children’s COVID-19 hotline is open 24/7 for your questions: Call 1.833.226.2362

KEY TIPS

- Stay calm and keep in mind: Coronavirus cases in children have been rare and those affected have experienced mild symptoms, similar to a common cold.
- Advise your patients to stay home if they’re sick and call ahead before coming in.
- Don’t see any patients with respiratory illness in your office.
- Don’t send patients to Connecticut Children’s ED for testing. Only send patients to the emergency room if the patient has difficulty breathing or other severe symptoms. Call our COVID-19 Hotline at 1.833.226.2362 for guidance first.
- Your patients should only seek further testing if recommended in the Quarantine Checklist below.
- If you don’t have PPE to complete a swab, don’t complete the swab in your office.
